**§ 39-4002. Compliance with law required**

It is unlawful for any person, firm, partnership, association or corporation to sell or offer for sale within this state any manufactured home that is not manufactured in compliance with this chapter after March 8, 1971.

**§ 39-4003A. Right of entry**

In order to carry out the purposes of this chapter, the administrator or his authorized representative shall, during regular working hours and at other reasonable times, have the right of entry to conduct the inspections required by this chapter; the right of entry to make inspections to carry out the duties and responsibilities as an in-plant inspection agency (IPIA) by the authority granted by the U.S. department of housing and urban development pursuant to 24 CFR 3282.352 and 362; and the right of entry to make inspections to carry out the duties and responsibilities as a state administrative agency (SAA) by the authority granted by the U.S. department of housing and urban development pursuant to 24 CFR 3282.305.

**§ 39-4004. Inspection and enforcement fees -- Schedule authorized**

(1) The administrator is authorized to establish a schedule of fees to pay the cost of inspection and enforcement of this chapter without recourse to tax subsidies. Such fee schedule shall be consistent with the actual cost of maintaining the program.

(2) The administrator shall be authorized to participate in the fee distribution system of the U.S. department of housing and urban development set out in 24 CFR 3282. The

administrator shall establish a monitoring inspection fee in an amount established by the secretary of the U.S. department of housing and urban development. This monitoring inspection fee shall be an amount paid by each manufactured home manufacturer in the state for each manufactured home produced by the manufacturer in the state. This fee shall be in addition to any in-plant inspection agency (IPIA) fees assessed by the administrator, which shall be consistent with the actual cost of providing such inspections.

(3) The monitoring inspection fee shall be paid by the manufacturer to the secretary of the U.S. department of housing and urban development who shall distribute the fees collected from all manufactured home manufacturers among the approved and conditionally-approved states based on the number of new manufactured homes whose first location after leaving the manufacturing plant is on the premises of a distributor, dealer, or purchaser in that state.

The warranty provided herein shall be in addition to and not in derogation of any other right or privilege which the buyer may have as otherwise provided by law or instrument. The

(e) Failure of any manufacturer, distributor or dealer of manufactured homes to establish and maintain such records, make such reports, and provide such information as the administrator of the division of building safety may reasonably require to enable him to determine whether such manufacturer, distributor or dealer has acted or is acting in compliance with this chapter and with federal manufactured home construction and safety standards; or failure to permit, upon request of a person duly designated by the administrator, inspection of appropriate books, papers, records and documents relative to determining whether such manufacturer, distributor or dealer has acted or is acting in compliance with federal manufactured home construction or safety standards.

**AND INSTALLER LICENSING**

**§ 44-2101. Purpose -- License required -- Reinstatement**

(2) On and after July 1, 2007, all applicants for retailer or resale broker original licensure will be required to submit to a fingerprint-based criminal history check of the Idaho central criminal database and the federal bureau of investigation criminal history database. Each applicant for original licensure must submit a full set of the applicant's fingerprints and any relevant fees directly to the Idaho state police and the federal bureau of investigation identification division for this purpose.

(3) If the licensee fails to submit a completed application for renewal or to pay the renewal fee on or before the expiration date, the administrator may accept a later application for reinstatement subject to such conditions as the board may require by rule including, but not limited to, the assessment of a late fee; provided that between the license expiration date and the date of reinstatement of the license, the rights of the licensee under such license shall be expired, and during such period of expiration it shall be unlawful for such licensee to do or attempt to offer to do any of the acts of the kind and nature described in the definitions in section 44-2101A, Idaho Code, in consideration of compensation of any kind or expectation thereof. (c) A copy of the complaint shall be served upon the defendant and the proceedings shall thereafter be conducted as in other similar civil actions. If the commission of the act or acts is established, the court shall enter a decree permanently enjoining the defendant from committing such act or acts. ## **TITLE 44. LABOR**

### **CHAPTER 25. MOBILE HOME REHABILITATION**

#### **§ 44-2501. Legislative intent**

In order to ensure a continued supply of safe, affordable housing, the state of Idaho hereby adopts a rehabilitation program for existing mobile homes constructed prior to June 15, 1976, the effective date of the federal manufactured housing and safety standards act (HUD code), that are currently sited within Idaho or that may be brought into the state after the effective date of this act. It is legislative intent that the relocation and installation of these homes be approved when the rehabilitation on the home has been completed as required in this chapter and proof of compliance has been issued by the administrator of the division of building safety of the state of Idaho.

#### **§ 44-2502. Application of chapter -- Rehabilitation required -- Certificate of compliance**

(1) This chapter shall apply to the installation of mobile homes constructed prior to June 15, 1976, within the jurisdiction of a city or county requiring an installation permit pursuant to section 44-2202, Idaho Code.

(2) Before a permit for the installation of the mobile home may be issued, the home must meet the rehabilitation requirements specified in this chapter and receive a certificate of compliance from the administrator of the division of building safety of the state of Idaho.

(3) Upon submission of the rehabilitation form required pursuant to section 44-2504, Idaho Code, and any other information required by the administrator to establish compliance with this chapter, the administrator shall issue a certificate of compliance to the homeowner. The certificate of compliance must be presented to the local jurisdiction before a permit for the installation of the home may be issued.

(4) Upon receipt of the certificate of compliance, the local jurisdiction shall issue the installation permit in the same manner as the permit would be issued with respect to a mobile/manufactured home for which rehabilitation is not required. No zoning or other ordinance or policy of the local jurisdiction prohibiting relocation or installation of a mobile home to which this chapter applies shall be effective to prohibit the relocation or installation of a mobile home for which a certificate of compliance has been issued in accordance with this chapter.

### § 44-2503. Rehabilitation requirements

The mobile home shall meet the following rehabilitation requirements:

(1) A smoke detector (which may be a single station alarm device) shall be installed on any wall in a hallway or space communicating with each bedroom area and the living area on the living area side and, when located in a hallway, the detector shall be between the return air intake and the living area. Each smoke detector shall be installed in accordance with its listing and the top of the detector shall be located on a wall four (4) inches to twelve (12) inches below the ceiling. The detector may be battery-powered or may be connected to an electrical outlet box by a permanent wiring method into a general electrical branch circuit, without any switch between the over current protection device protecting the branch circuit and the detector.

(2) The walls, ceilings and doors of each compartment containing a gas-fired furnace or water heater shall be lined with five-sixteenth (5/16) inch gypsum board, unless the door opens to the exterior of the home, in which case, the door may be all metal construction. All exterior compartments shall seal to the interior of the mobile home.

(3) Each room designated expressly for sleeping purposes shall have an exterior exit door or at least one (1) outside egress window or other approved exit device with a minimum clear dimension of twenty-two (22) inches and a minimum clear opening of five (5) square feet. The bottom of the exit shall not be more than thirty-six (36) inches above the floor.

(4) All electrical systems shall be tested for continuity to assure that metallic parts are properly bonded, tested for operation to demonstrate that all equipment is connected and in working order, and given a polarity check to determine that connections are proper. The electrical system shall be properly protected for the required amperage load. If the unit wiring is of aluminum conductors, all receptacles and switches rated twenty (20) amperes or less directly connected to the aluminum conductors shall be marked CO/ALR. Exterior receptacles other than heat tape receptacles shall be of the ground fault circuit interrupter (GFI) type. Conductors of dissimilar metals (copper/aluminum or copper clad aluminum) must be connected in accordance with section 110-14 of the national electrical code.

(5) The mobile home's gas piping shall be tested with the appliance valves removed from the piping system and piping capped at those areas. The piping system shall withstand a pressure of at least six (6) inch mercury or three (3) psi gauge for a period of not less than ten (10) minutes without showing any drop in pressure. Pressure shall be measured with a mercury manometer or a slope gauge calibrated so as to read in increments of not greater than one-tenth (1/10) pound or an equivalent device. The source of normal operating pressure shall be isolated before the pressure test is made. After the appliance connections are reinstalled, the piping system and connections shall be tested with line pressure of not less than ten (10) inches nor more than fourteen (14) inches water column air pressure. The appliance connections shall be tested for leakage with soapy water or a bubble solution. All gas furnaces and water heaters shall be vented to the exterior in accordance with chapter 9 of the uniform mechanical code.

(6) A full water or air pressure test will be performed on the mobile home's water and sewer system.

(a) Water piping shall be tested and proven tight under a water pressure not less than the working pressure under which it is to be used. The water used for tests shall be obtained from a potable source of supply. A fifty (50) pound per square inch (344.5kPa) air pressure may be substituted for the water test. In either method of test, the piping shall withstand a test without

leaking for a period of not less than fifteen (15) minutes.

(b) A water test shall be applied to the drainage and vent system either in its entirety or in sections. If applied to the entire system, all openings in the piping shall be tightly closed, except at the highest opening, and the system filled with water to the point of overflow. If the system is tested in sections, each opening shall be tightly plugged except the highest opening of the section under the test and each section shall be filled with water, but no section shall be tested with less than a ten (10) foot (3m) head of water. In testing successive sections, at least the upper ten (10) feet (3m) of the next preceding section shall be tested, so that no joint or pipe in the structure, except the uppermost ten (10) feet (3m) of the system, shall have been submitted to a test of less than a ten (10) foot (3m) head of water. The water shall be kept in the system or in the portion under testing for at least fifteen (15) minutes before inspection starts. The system shall be tight at all points.

(7) All repairs or other work necessary to bring the mobile home into compliance with the requirements of this section shall be completed before a certificate of compliance may be issued.

**02. Scope.** These rules shall apply to the rehabilitation of mobile homes constructed prior to June 15, 1976, intended for relocation into a city or county requiring an installation permit pursuant to Section 44-2202, Idaho Code. (7-1-99)

**a.** Before a permit for the installation of the mobile home may be issued, the home must meet the rehabilitation requirements specified in this chapter and receive a certificate of compliance from the administrator of the Idaho Division of Building Safety. (7-1-99)

**b.** Upon submission of the rehabilitation form required pursuant to Section 44-2504, Idaho Code, and any other information required by the administrator to establish compliance with this chapter, the administrator shall issue a certificate of compliance to the homeowner. The certificate of compliance must be presented to the local jurisdiction before a permit for the installation of the home may be issued. (7-1-99)

**c.** Upon receipt of the certificate of compliance, the local jurisdiction shall issue the installation permit in the same manner as the permit would be issued with respect to a mobile/manufactured home for which rehabilitation is not required. No zoning or other ordinance or policy of the local jurisdiction prohibiting relocation or installation of a mobile home to which this chapter applies shall be effective to prohibit the relocation or installation of a mobile home for which a certificate of compliance has been issued in accordance with this rule. (7-1-99)

**002. WRITTEN INTERPRETATIONS.**

The Division may from time to time provide legal opinions regarding these rules. To the extent not privileged, these documents will be made available for inspection at the Division's main office, 1090 E. Watertower Street, Meridian, Idaho. (7-1-99)

**011. REHABILITATION REQUIREMENTS.**

The mobile home shall meet the following rehabilitation requirements: (7-1-99)

Smoke Detectors.** A smoke detector (which may be a single station alarm device) shall be installed on any wall in a hallway or space communicating with each bedroom area and the living area on the living area side and, when located in a hallway, the detector shall be between the return air intake and the living area. Each smoke detector shall be installed in accordance with its listing and the top of the detector shall be located on a wall four (4) inches to twelve (12) inches below the ceiling. The detector may be battery powered or may be connected to an electrical outlet box by a permanent wiring method into a general electrical branch circuit, without any switch between the over current protection device protecting the branch circuit and the detector. (7-1-99)

**02. Gas Furnace and Water Heater Compartment Protection.** The walls, ceilings and doors of each compartment containing a gas-fired furnace or water heater shall as a minimum be lined with five-sixteenth (5/16) inch gypsum board, unless the compartment access door opens to the exterior of the home, in which case, the door may be all metal construction. All exterior compartments shall seal to the interior of the mobile home. (7-1-99)

**03. Egress From Sleeping Areas.** Each room designated expressly for sleeping purposes shall have an exterior exit door or at least one (1) outside egress window or other approved exit device with a minimum clear dimension of twenty-two (22) inches and a minimum clear opening of five (5) square feet. The electrical system shall be properly protected for the required amperage load. If the unit wiring is of aluminum conductors, all receptacles and switches rated twenty (20) amperes or less directly connected to the aluminum conductors shall be marked CO/ALR. Exterior receptacles other than heat tape receptacles shall be of the ground fault circuit interrupter (GFI) type. Conductors of dissimilar metals (copper/aluminum or copper clad aluminum) must be connected in accordance with Section 110-14 of the National Electrical Code. (7-1-99)

**05. Gas System Testing.** The mobile home's gas piping shall be tested with the appliance valves removed from the piping system and piping capped at those areas. The piping system shall withstand a pressure of at least six (6) inch mercury or three (3) psi gauge for a period of not less than ten (10) minutes without showing any drop in pressure. Pressure shall be measured with a mercury manometer or a slope gauge calibrated so as to read in increments of not greater than one-tenth (1/10) pound or an equivalent device. The source of normal operating pressure shall be isolated before the pressure test is made. After the appliance connections are reinstalled, the piping system and connections shall be tested with line pressure of not less than ten (10) inches nor more than fourteen (14) inches water column air pressure. The appliance connections shall be tested for leakage with soapy water or a bubble solution. The water used for tests shall be obtained from a potable source of supply. A fifty (50) pound per square inch (344.5kPa) air pressure may be substituted for the water test. In either method of test, the piping shall withstand a test without leaking for a period of not less than fifteen (15) minutes. (7-1-99)

**b.** A water test shall be applied to the drainage and vent system either in its entirety or in sections. If applied to the entire system, all openings in the piping shall be tightly closed, except at the highest opening, and the system filled with water to the point of overflow.
