

## **IDAPA 07.01.04**

### **013. SPECIALTY EXPERIENCE REQUIREMENT**

**01. Specialty Journeyman Electrician.** An applicant for a specialty journeyman electrician license must have at least two (2) years experience, or more as specified for the individual specialty, with the type of installation for which the license is being applied for, in compliance with the type of installation for which the license is being applied for, in compliance with the requirements of the state in which the experience was received, or as a specialty electrical trainee making electrical installations in accordance with the requirements as stated herein.

**02. Specialty Electrical Trainee.** A specialty electrical trainee shall be required to work two (2) years, defined as a minimum of four thousand (4,000) hours of work experience, under the constant on-the-job supervision of a specialty journeyman electrician of the same specialty category to qualify for testing as a specialty journeyman electrician. Specific specialty licenses may require more than two (2) years experience as stipulated by the board. ...

### **014. ELECTRICAL SPECIALTIES REQUIRING A SPECIAL LICENSE.**

**08. Electrical Lineman.** All such installation, maintenance, and repair performed by individuals under this subsection shall be done in accordance with the applicable provisions of the National Electrical Code. The licensee shall be employed by a licensed electrical contractor whose license shall be covered by this category. The holder of such specialty license may not countersign a contractor's license application as a supervising specialty journeyman except for work in his specialty. Applicants for this license class shall provide documentation of having completed an electrical lineman apprenticeship program or similar program approved by the US Department of Labor, Office of Apprenticeship. Any person currently licensed in this category may perform the following types of installations:

- a. Overhead distribution and transmission lines.
- b. Underground distribution and transmission lines.
- c. Substation and switchyard construction.

**09. Solar/Photovoltaic Technician.** All such installation, maintenance, and repair performed by individuals under this subsection shall be done in accordance with the applicable provisions of the National Electrical Code. The licensee shall be employed by a licensed electrical contractor whose license shall be covered by this category. The holder of such specialty license may not countersign a contractor's license application as a supervising specialty journeyman except for work in his specialty. Applicants for this license class shall provide documentation of having a NABCEP (North American board of Certified Energy Practitioners) PV Entry Level Certificate of Knowledge or other credential approved by the board. Any person currently licensed in this category may perform the following types of installations:

- a. Solar panels, components, and associated wiring between the panels and the inverter.
